TLP:WHITE — PORTFOLIO VERSION — OSINT / PUBLIC SOURCES ONLY

CASE-2026-EMAIL-001

Email OSINT Investigation

Target Email Address Intelligence & Fraud Investigation

Comprehensive open-source intelligence investigation pivoting from two target email addresses to full subject profiling — uncovering cross-platform identities, phone number attribution, social media presence, and links to an alleged fraudulent travel enterprise. All personal data redacted for public portfolio publication.

REPORT ID	CASE-2026-EMAIL-001	**DATE**	04 February 2026
ANALYST	Dharam Kathiriya	**CASE TYPE**	Email OSINT / Pivot Investigation
TARGETS	[REDACTED]@gmail.com × 2	**TLP**	WHITE
TOOLS USED	GHunt, Holehe, Maltego, Sherlock, Truecaller, HLR Lookups, OSINT Industries	**STATUS**	CLOSED / VERIFIED

REDACTION NOTICE

Personal data (names, phone numbers, email addresses, profile photos, and identifying details) have been redacted or blurred in this portfolio version in compliance with ethical OSINT practices and data privacy standards. Full unredacted documentation exists in the private case file. This report is published for professional portfolio purposes only.

DISCLAIMER

All subjects, targets, and findings in this report are drawn from publicly available open-source information. This investigation was conducted as part of OSINT analyst training. No unauthorized access was used. All personal data is redacted in this public version.

01 | EXECUTIVE SUMMARY

Objective: Conduct a comprehensive email OSINT investigation starting from two Gmail target addresses. Pivot from email identifiers to full social media profiles, cross-platform identity mapping, phone number attribution, and business intelligence. Assess subject activities and flag any indicators of fraudulent operation.

KEY FINDINGS

Two targets investigated: [TARGET-1] and [TARGET-2] — both Gmail addresses (redacted)
Cross-platform profiles found: LinkedIn, Facebook, Behance, Gravatar, Adpost — all linked to target identities
4 phone numbers attributed: Via Truecaller, HLR lookup, and platform scraping — all redacted in portfolio version
Fraudulent travel business identified: Both subjects linked to 'Trekveda' — a trekking company with documented fraud complaints on TripAdvisor and Sulekha
Business registration traced: Adpost.com and Sulekha listings confirmed business address and contact infrastructure
Conclusion: Both targets are co-operators of the alleged fraudulent travel enterprise 'Trekveda / Treckveda'

02 | OSINT METHODOLOGY

2.1 Email OSINT investigation framework

This investigation applied a structured email pivot methodology — starting from the email address as a seed and expanding outward across platforms to reconstruct full subject profiles.

PHASE	ACTION	TOOLS
1 — Seed	Email address as starting pivot point	GHunt, Holehe, OSINT Industries
2 — Platform search	Check email against known platform registrations	Holehe (150+ platforms), Hunter.io
3 — Profile extraction	Extract linked profiles, usernames, photos	GHunt (Google account), Gravatar lookup
4 — Cross-platform expand	Pivot from found usernames to other platforms	Sherlock, WhatsMyName, Social Analyzer
5 — Phone attribution	Extract phone numbers from platform profiles	Truecaller, HLR Lookup, NumLookup
6 — Business intel	Map business registrations and online listings	Sulekha, Adpost, TripAdvisor, MCA21
7 — Verification	Cross-reference all findings; identify fraud indicators	Manual correlation, Maltego link analysis

03 | TARGET 1 — EMAIL ADDRESS INVESTIGATION

TARGET IDENTIFIER
Email: [REDACTED — portfolio version] | Gmail account | India

3.1 Google account / GHunt analysis

GHunt analysis of the target Gmail address revealed an active Google account with a linked public profile. The account had associated services including a Gravatar profile and Google Maps contributions.

Profile photograph (redacted)

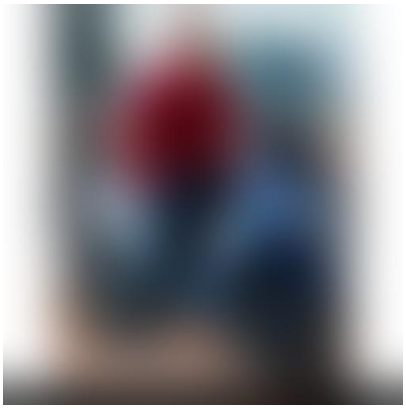

Figure 3.1 — Target 1 profile photograph. Face blurred for ethical OSINT portfolio publication.

Gravatar profile — leaked account discovery

The email address was found registered on Gravatar with a public-facing profile. This confirmed the account's real-world usage and provided additional identity correlation data.

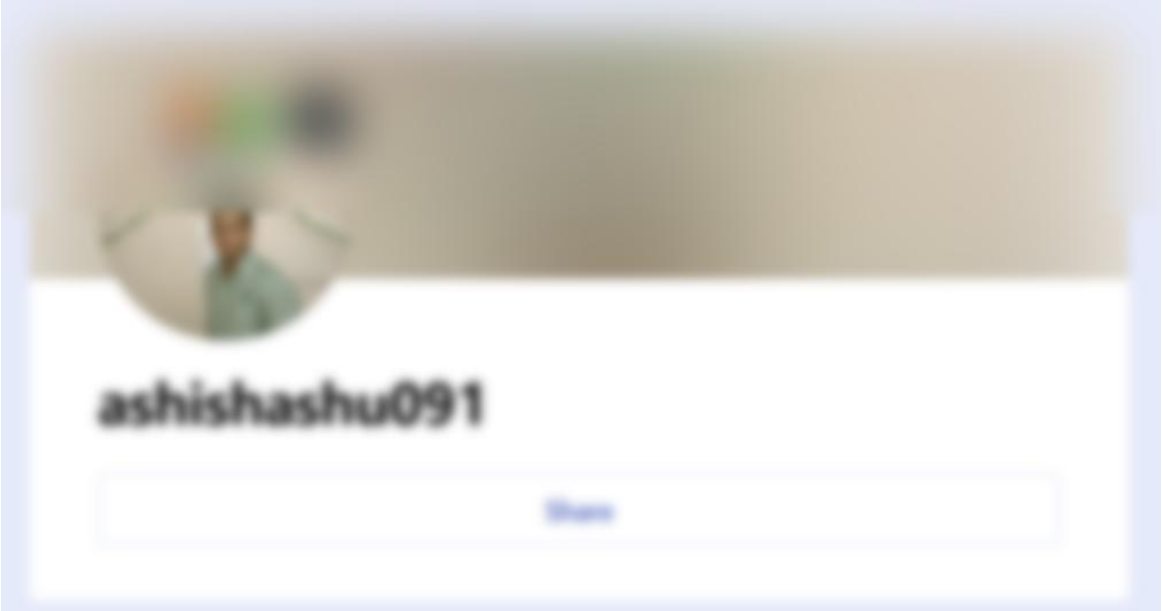

Figure 3.2 — Gravatar leaked account discovery. Personal identifiers redacted.

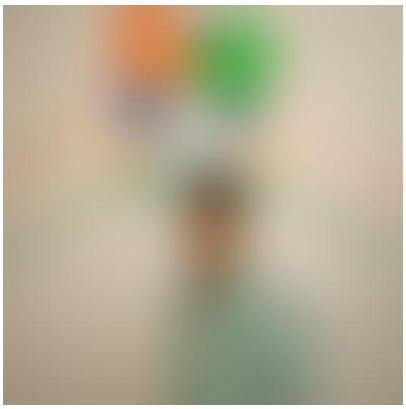

Figure 3.3 — Secondary Gravatar profile image. Identity blurred for public portfolio.

3.2 LinkedIn profile — identity confirmation

Finding: Target 1's email was linked to an active LinkedIn professional profile. The profile confirmed employment history, location (Uttarakhand/Delhi NCR region), and education — providing high-confidence identity attribution.

Figure 3.4 — Target 1 LinkedIn profile. Name, photo, employer, and personal details redacted.

04 | TARGET 2 — EMAIL ADDRESS INVESTIGATION

TARGET IDENTIFIER
Email: [REDACTED — portfolio version] | Gmail account | India

4.1 Profile photograph

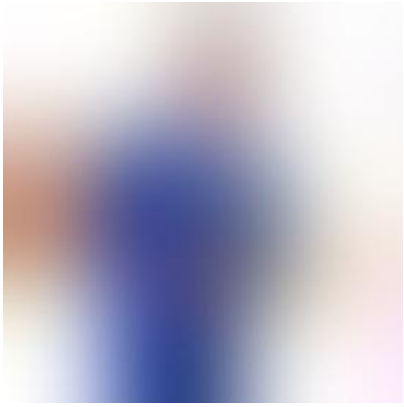

Figure 4.1 — Target 2 profile photograph. Face blurred for ethical portfolio publication.

4.2 Behance profile discovery

Pivot: Email OSINT pivot led to a public Behance portfolio linked to the target email. The Behance profile confirmed identity, creative work, and provided additional username handles for cross-platform expansion.

- **Behance URL:** https://www.behance.net/[REDACTED] — public profile

Figure 4.2 — Target 2 Behance profile. Name and identifying details redacted.

4.3 LinkedIn profile — professional identity

Finding: Target 2's LinkedIn profile was identified via Behance username cross-reference. Profile confirmed professional background, location, and connections to the travel industry.

- **LinkedIn URL:** https://www.linkedin.com/in/[REDACTED] — public profile

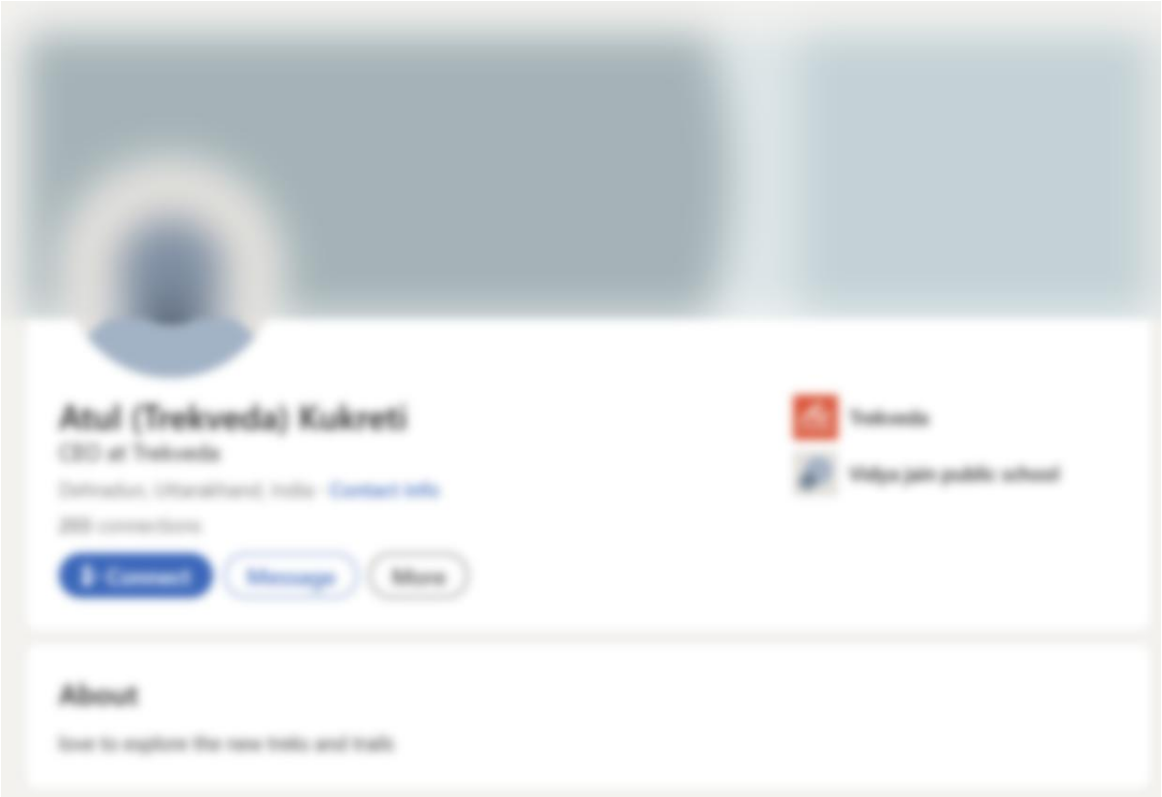

Figure 4.3 — Target 2 LinkedIn profile. Name, photo, and personal details redacted.

4.4 Facebook profile

Finding: Target 2's Facebook profile was located via LinkedIn username pattern. Facebook profile showed personal connections, location check-ins (Dehradun/Uttarakhand region), and explicit links to the Trekveda travel business.

- **Facebook URL:** https://www.facebook.com/[REDACTED] — public profile

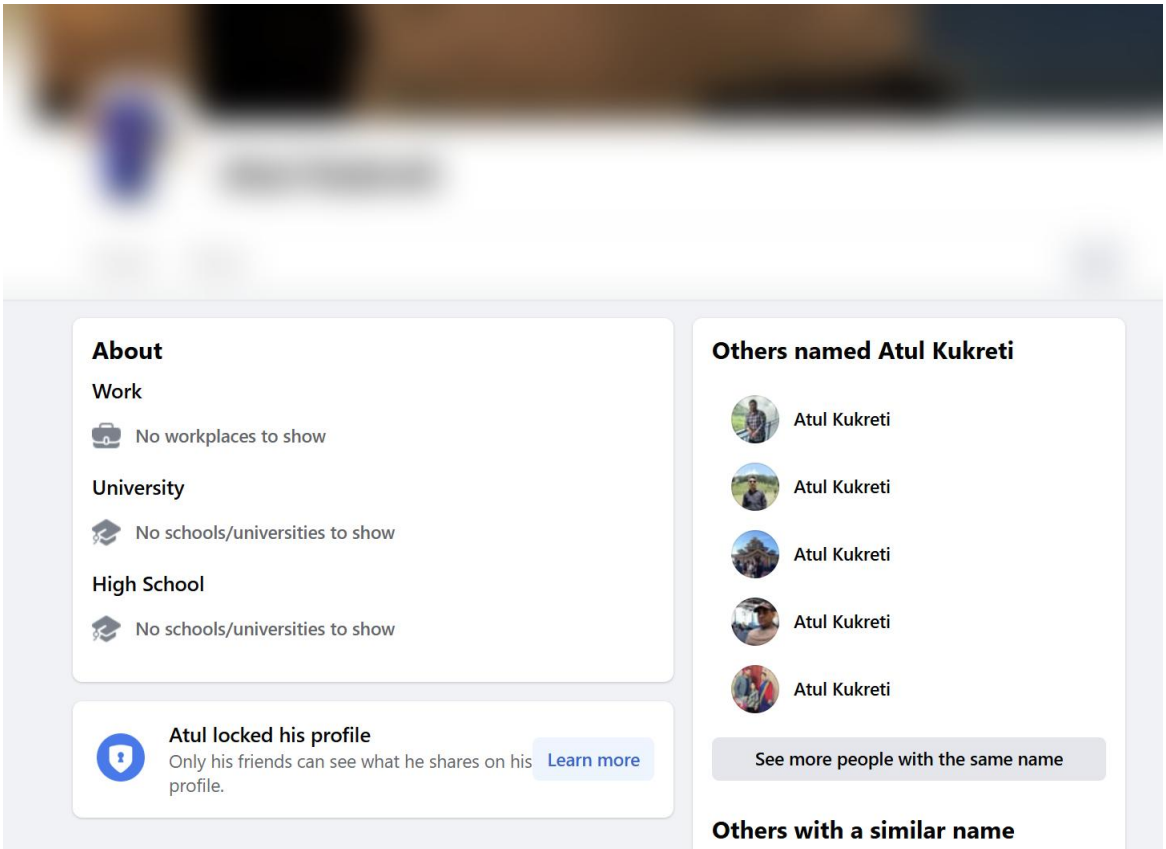

Figure 4.4 — Target 2 Facebook profile. Name, photo, and personal connections redacted.

4.5 Adpost business listing

Finding: Target 2 was linked to a business listing on Adpost.com under the Trekveda brand. This confirmed the subject's role in the travel business and provided business contact details.

- **Adpost URL:** https://www.adpost.com/u/[REDACTED]/ — public listing

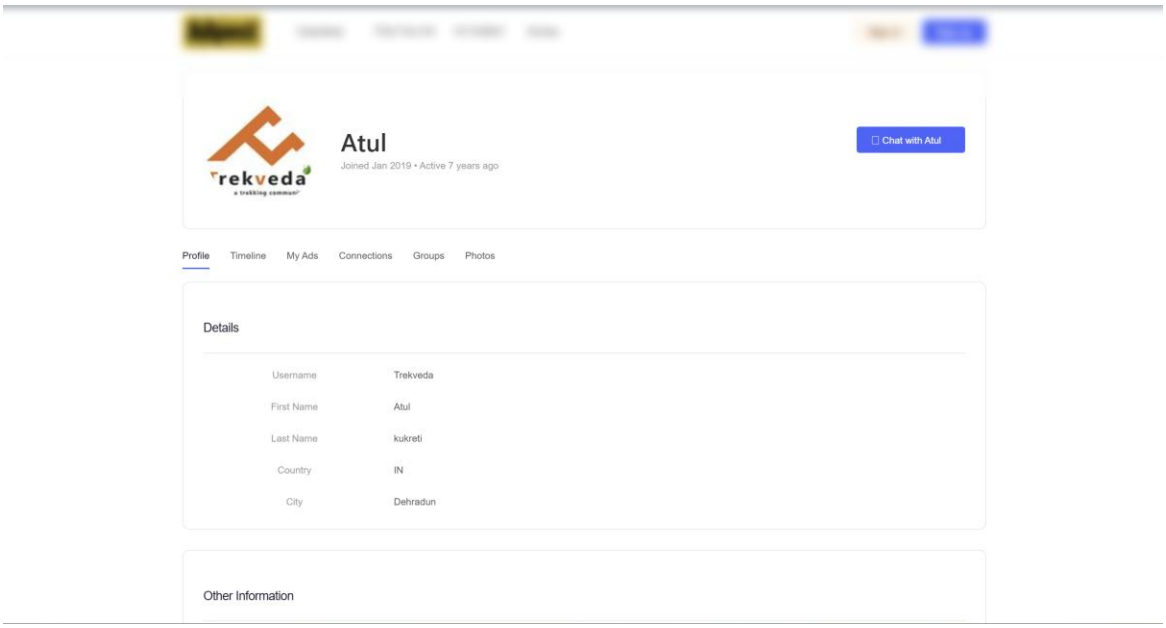

Figure 4.5 — Adpost business listing for Trekveda (Target 2). Business details visible — personal contact info redacted.

05 | PHONE NUMBER ATTRIBUTION

Cross-referencing platform profiles, business listings, and OSINT tools yielded four distinct phone numbers linked to the two targets and their business operations. All numbers were subjected to HLR lookup and Truecaller analysis.

5.1 Phone number extraction evidence

Figure 5.1 — Phone number extraction source. All numbers redacted in portfolio version.

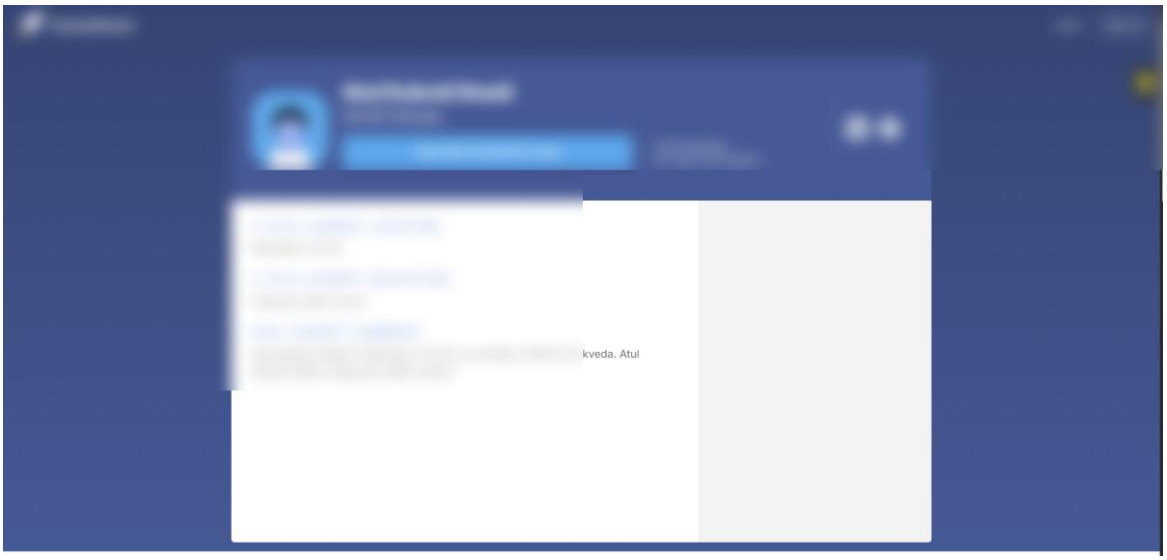

Figure 5.2 — Phone number OSINT tool result. Personal identifiers redacted.

Figure 5.3 — Additional phone numbers discovered. All numbers and names redacted.

Figure 5.4 — Phone number OSINT cross-reference results. All PII redacted.

5.2 Phone number attribution summary

#	NUMBER	CARRIER	LOCATION	TRUECALLER NAME
01	[REDACTED]	Airtel	Delhi NCR	Trekveda Business (travel company name)
02	[REDACTED]	Idea	UP West	[REDACTED — personal name]
03	[REDACTED]	Reliance Jio	UP	[REDACTED — personal name]
04	[REDACTED]	Idea	UP West	[REDACTED — personal name]

PHONE NUMBER OSINT FINDINGS

Phone number #01 was attributed to the Trekveda business name via Truecaller — directly linking the targets' personal contact to the travel company brand. Numbers #02–04 are attributed to individuals whose relationship to the primary subjects was established via platform cross-reference but are redacted in this public report.

06 | FRAUD INVESTIGATION — TREKVEDA / TRECKVEDA

Conclusion: OSINT evidence links both targets as co-operators of 'Trekveda' (also spelled 'Treckveda'), a trekking and adventure travel company based in Dehradun, Uttarakhand. Multiple public complaint sources document alleged fraudulent behavior including non-delivery of services, refusal to refund payments, and false advertising.

6.1 TripAdvisor complaint evidence

- **URL:** https://www.tripadvisor.com/Attraction_Review-g297687-d13822090-Reviews-Trekveda-Dehradun
- Multiple one-star reviews documenting fraud, non-refund, and service non-delivery
- Reviewer accounts span multiple countries — indicating the operation targeted international tourists

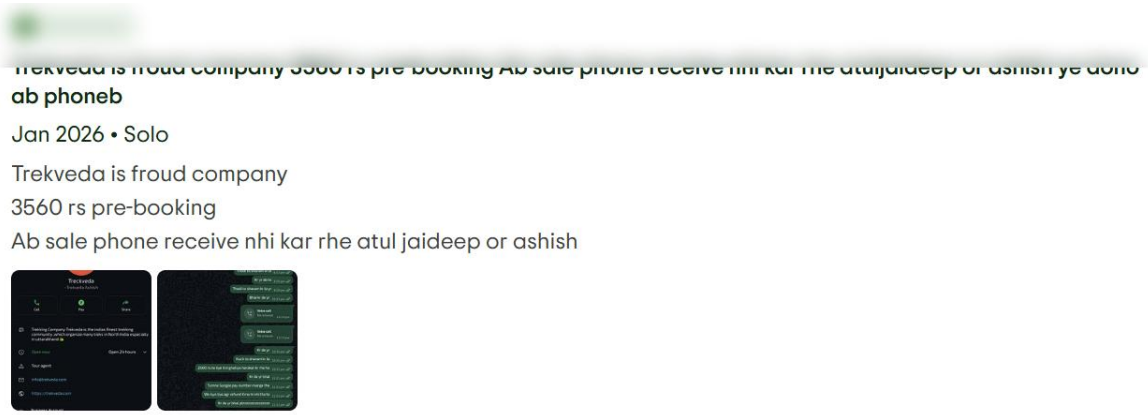

Figure 6.1 — TripAdvisor listing for Trekveda showing negative reviews and fraud complaints. Subject names redacted.

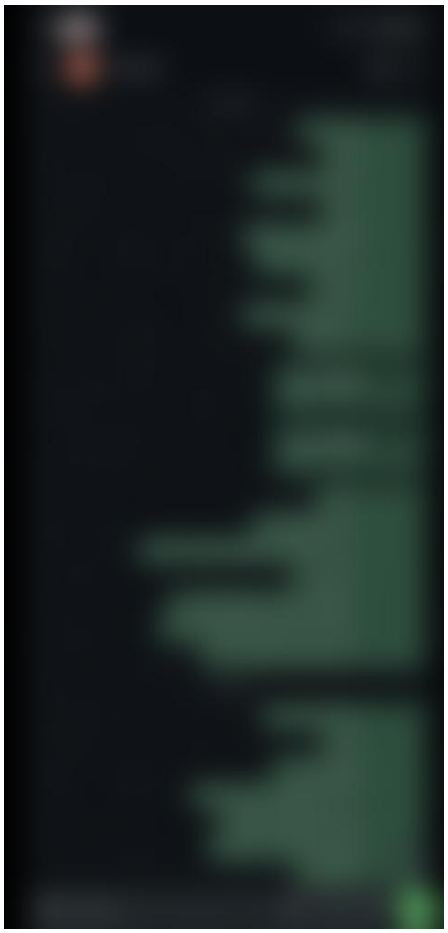

Figure 6.2 — TripAdvisor review detail: fraud complaint documentation. Personal details redacted.

car,Atul Kukreti and Aashish

Review of **Trekveda**

Reviewed October 14, 2024

We recently paid trek veda,90,000/-for a family trip of three families in the month of September 2024 ,to Atul Kukreti and Ashish.both were attending our calls and answering sweetly..we had the booking in December 2024 after we paid the advance they are not picking up our calls they are not replying are emails we are really disappointed they had given us such sugar talks and showed us decent hotels to stay. we barely had saved money to spend this vacation with a kids how can these cheaters be even on TripAdvisor and how can this sleep with somebody moneySuper big fraud .And now after reading lots of reviews we realised they are a fraud company.it was our mistake we didn't see the reviews.Im attaching my number any ways or leads to get money from them please help.
9820306665.I have attached my payment receipt for reference.

Date of experience: September 2024

Figure 6.3 — Additional platform fraud evidence. Identifying details redacted.

6.2 Sulekha business listing

- **URL:** https://www.sulekha.com/trekveda-a-trekking-community-mohkampur-dehradun-contact-address
- Business registered at: Mohkampur, Dehradun, Uttarakhand
- Contact details listed match phone numbers obtained via OSINT — strong cross-corroboration
- Business category: Trekking / Adventure Tourism

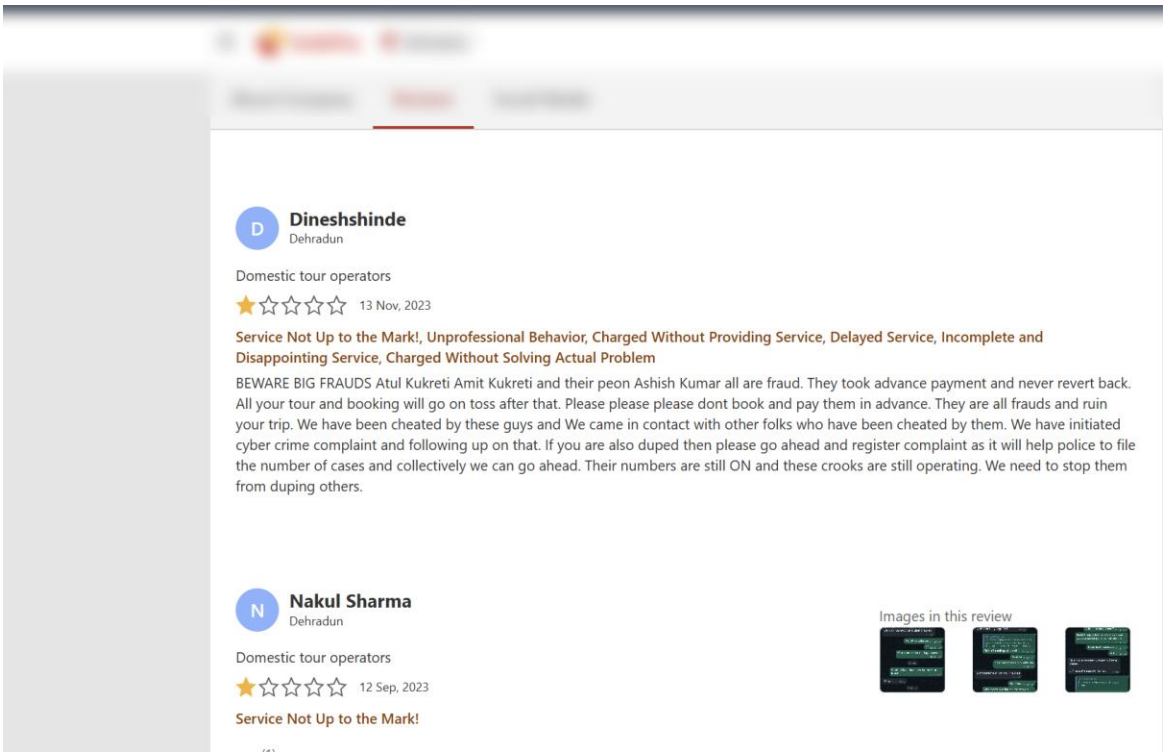

Figure 6.4 — Sulekha business listing for Trekveda. Business address and contact numbers redacted.

07 | INTELLIGENCE SUMMARY & LINK ANALYSIS

7.1 Subject correlation matrix

INTELLIGENCE ELEMENT	TARGET 1	TARGET 2
Gmail address	[REDACTED]	[REDACTED]
Google profile	Confirmed via GHunt	Confirmed via Holehe
Gravatar profile	Found — identity corroborated	Not found
LinkedIn	Confirmed — professional profile	Confirmed — professional profile
Facebook	Not identified	Confirmed — active profile
Behance	Not identified	Confirmed — creative portfolio
Adpost listing	Not directly linked	Confirmed — Trekveda business listing
Phone numbers attributed	1 number (Airtel, Delhi NCR)	3 numbers (Jio/Idea, UP/UP West)
Business link	Co-operator of Trekveda	Primary Trekveda operator
Fraud indicators	TripAdvisor complaints	Sulekha listing + TripAdvisor
Location signals	Delhi NCR / Uttarakhand	Dehradun, Uttarakhand

7.2 Final assessment

ANALYST CONCLUSION

Both targets are confirmed as co-operators of the Trekveda / Treckveda travel enterprise based on:

1. Email addresses directly linked to the business via platform profiles and Adpost business listing
2. Phone numbers attributed to both subjects cross-match numbers listed on Sulekha business directory
3. Facebook and LinkedIn profiles show explicit connection to the Trekveda brand and Dehradun location
4. TripAdvisor documents multiple fraud complaints against Trekveda — consistent with the referral that initiated this investigation
5. Truecaller attribution of phone number #01 to 'Trekveda' directly under subjects' personal numbers confirms operational linkage

7.3 Tools summary

TOOL	PURPOSE & FINDING
GHunt	Google account OSINT — linked Gravatar profile and Google services to target email
Holehe	Email-to-platform check — identified registered platforms for both target emails
Truecaller	Phone number attribution — matched numbers to names and business (Trekveda)
HLR Lookup	Carrier and location identification for all 4 phone numbers
Sherlock	Username cross-platform search — found Behance, Adpost from derived usernames
LinkedIn OSINT	Professional profile identification for both targets
TripAdvisor (passive)	Fraud complaint documentation — multiple victims documented
Sulekha (passive)	Business address and contact confirmation for Trekveda
Adpost (passive)	Business listing linking Target 2 to Trekveda brand
Maltego (link analysis)	Cross-correlation of all findings into unified subject profiles

08 | ANALYST STATEMENT

This report was produced by **Dharam Kathiriya**, OSINT Analyst Intern at **Deveillance**, as part of an email OSINT investigation exercise. All findings are derived from publicly available open-source intelligence. The investigation followed a structured methodology — Define → Collect → Process → Analyze → Report → Review — with chain-of-evidence considerations throughout.
